

CBGP
UPM-INIA

POLITÉCNICA

CAMPUS
DE EXCELENCIA
INTERNACIONAL

Centro de Biotecnología y Genómica de Plantas

Departamentos de Biotecnología UPM-INIA

Ciclo de seminarios 2016/17 - Primer cuatrimestre

7 de octubre

F. Javier Cejudo -Universidad de Sevilla, España
A novel model of chloroplast redox regulation

14 de octubre

Víctor Parro -Centro de Astrobiología INTA-CSIC Madrid, España
Subsurface microbiology in extreme environments and the search for life in planetary exploration

21 de octubre

Luis Vidali-Worcester Polytechnic Institute, Massachusetts, USA
The moss *Physcomitrella patens* as a model system for Plant Cell Biology

4 de noviembre

Antonio Di Pietro-Universidad de Córdoba, España
Host plant directional sensing and chemical reprogramming by the fungal pathogen *Fusarium*

11 de noviembre

M. Ángel Blázquez-Instituto de Biología Molecular y Celular de Plantas IBMCP, Valencia, España
A role for auxin methylation during differential growth

18 de noviembre

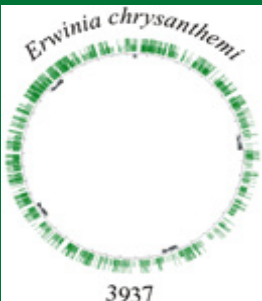

Nikko Gelder - University of Lausanne, Switzerland
The endodermis - how to build a protective and selective barrier

25 de noviembre

Pilar Cubas - Centro Nacional de Biotecnología, CSIC, Madrid, España
To branch or not to branch: a bud´s question

16 de diciembre

Angélique Déleris - Institut de Biologie de l'École Normale Supérieure, Paris, France
Reactivation of repeated sequences during plant innate immunity

13 de enero

Richard O'Connell - UMR BIOGER, INRA, AgroParisTech, Université Paris-Saclay, France
Fungal appressoria as organs for delivering protein and metabolite effectors into host cells

20 de enero

Francisco López Ruiz - Centre for Crop and Disease Management (CCDM). Department of Environment & Agriculture, Curtin University, Australia
Arms race in the (battle) fields: new tools and developments in the fungicide resistance war
