Part-time technician T3 position at Plantdynamics lab

PlantDynamics laboratory at the CBGP (UPM-INIA) is looking for a talented T3 technician to join an international team that aims to understand hormone signaling and cell communication systems in plants and fungi supported by project no. PGC2018-093387-A-I00. We use cutting edge technologies such as synthetic biology, microfluidics, computer simulations, and image analysis.

Requirements: A suitable candidate must have experience in molecular biology techniques including cell culturing media preparation (plants and yeast), gel electrophoresis, PCR, molecular cloning. Additional experience with fluorescent microscopy techniques is desired. Very good English language skills are critical.

Responsibilities: She or he will be responsible for assisting in project development by preparing medias, coculturing cells, molecular cloning, microscopy analysis, live-cell imaging.

Offer details: The initial appointment is the trial period of 3 months (25h/per week) at T3 salary level with the possibility for an extension. The anticipated start date is the 1st of June 2021.

How to apply:

Please send your CV and describe your motivations to join the lab at the latest by **21st May 2021 at 2 p.m.**

Contact: Dr. Krzysztof Wabnik (k.wabnik@upm.es)
